### High lights

The modular design allows customization of solutions to meet your current needs, plus the ability to expand in the future.

Compatible with Agvance, Agvantage, and Agvision, among other accounting packages.

#### SECURED ACCESS

Allow only the proper vehicles gain access to your facility by controlling gates and doors with RFID readers; ensure the right trucks get to the right dump pits.

#### IDENTIFICATION

An RFID system with tags installed directly on a vehicle can also reduce slow-downs and prevent costly inventory errors by automatically sending scale data directly to your accounting software.

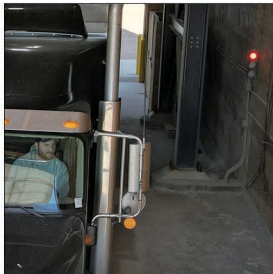

#### CAMERA

Monitor the operation of grain probes, view drivers, check to see if a vehicle is completely on the scale, and more.

#### PHOTO EYE

Ensure a vehicle is properly positioned on the scale; weight recording is interrupted if a beam is broken.

#### TRAFFIC LIGHTS

Visual signals direct drivers to move onto or off a scale, into a receiving/loadout building, or anywhere necessary on a site.

#### MESSAGE BOARD

Communicate with drivers via a 60" message board; customized messages can provide load information, next destination, and more.
