

Kahler Automation's compact and efficient Modular Dry System operates your facility's dry tower with a defined set of weigh hopper, mixer, and loadout configurations.

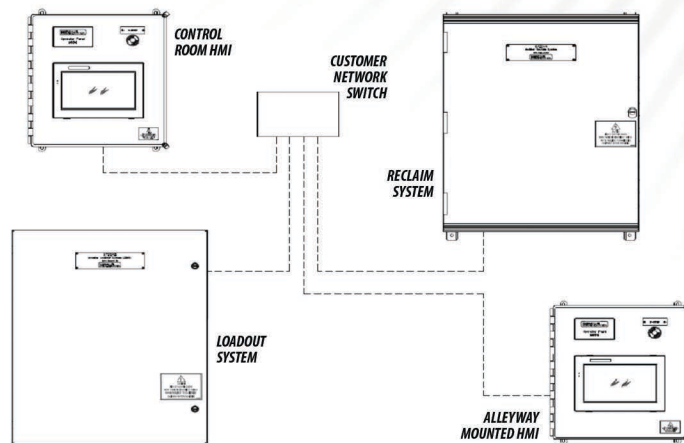

Modular Dry Benefits

- Customize to various loadout systems
- Functional control from reclaim to loadout
- Easy operation through touchscreen panel and Plant Supervisor software
- Seamless integration with agronomy interfaces
- Control reclaim, bin levels, and distributor via tablet from loader

SYSTEM OVERVIEW

of the Modular Dry Reclaim & Loadout System

Modular Dry

RECLAIM SYSTEM

Key Features

- Conditioner
- Feed conveyor
- Conveyor plug switch
- Leg
- Leg speed sensors
- Up to 16 position distributor
- Up to 16 bin high levels
- Up to 16 bin low levels
- 5-position leg distributor (optional)
- 2 two-way valves (optional)
- Micro bin conveyor (optional)

Modular Dry System Options

- Dust spout control
- Traffic light control
- Alleyway lights
- Wireless loader tablet controls
- Computer controls agronomy/ERP order automation interfaces

LOADOUT SYSTEM

Key Features

- Model 2850 Vertical Mixer
 - 1 weigh hopper
 - 2 mixers
 - 2 traffic light control
- Model 2866 Horizontal Paddle Mixer
 - 2 weigh hoppers
 - 1 mixer
 - 1 traffic light control
- Up to 16 two-stage bin gates
- Dust spout control
- Surge tank indication
- Traffic lights
