Automatically capture your product data

Bulk Receiving 2 software is designed to automatically capture data during the product receiving process. Information such as the bulk product and supplier can be entered in advance within Terminal Management TMX or supplied when receiving the bulk product.

Benefits

Efficiency Accuracy Productivity Ease of Use Inventory Management

Features

• **Remote Management:** Access order entry, inventory, receipts, and report viewing via Terminal Management TMX from any device with a web browser. E-mail for load tickets and reports.

• **Dry Systems:** Belt scale captures bulk product into inventory.

• **Liquid Systems:** Liquid metering captures received product for tanks.

• **Truck Scale Integration:** Captures received bulk product using truck scale readings.

To learn how our systems can help give you control at your facility, please contact your Kahler Territory Sales Manager. Don't know who that is? Visit **KahlerAutomation.com/sales** to find out!

High lights

CONVENIENT
• With the touchscreen the quantity received, driver, transport, and bulk product can all be easily input and documented.

FLEXIBLE
• Order details like the product and supplier can either be pre-entered in the system or provided during the receipt of the bulk product.

PRECISE
• Devices such as magnetic flow meters can be used to measure product being received.

QUALITY ASSURANCE
• Destinations are set automatically so product goes to the assigned tank.
