Grain Automation

Take total control of your grain system

High
lights

TRAFFIC CONTROL

Get site access control, scale weights, vehicle management and traffic flow control

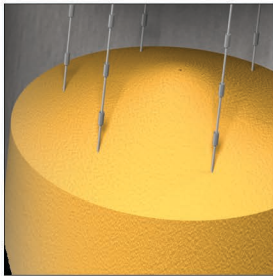

DESTINATION CONTROL

Control grain flow with the touch of a finger. Kahler's grain flow systems verify a clear path and initiate all the equipment; change the source/destination on the go.

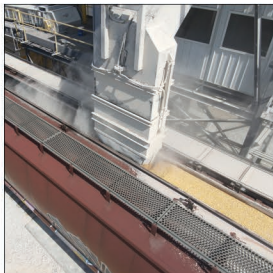

HAZARD MONITORING

Protect your facility with critical monitoring for high temps, plugs, etc. If necessary, equipment upstream is shut down immediately while downstream equipment purges then stops.

BIN MONITORING

Set high-level marks to stop filling automatically or utilize sensors for continuous level displays. Monitor temperature and control fans via touchscreen.

LOADOUT

No facility is too large or too small; Kahler controls integrate any type of receiving and loadout, whether by truck, rail, or barge.

To learn how our grain systems can help give you control at your facility, contact your Kahler Territory Sales Manager. Don't know who that is? Visit KahlerAutomation.com/sales to find out!
